DETAILED ACTION

Claims 1-4 are currently pending.

Election/Restriction

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, drawn to "combinatorial biosyntheses of compounds", classified in many different classes and subclasses upon election of the particulars of the method (e..g final product, reagents and types of modification) including class 435, subclass 4+.
 - II. Claim 4, drawn to "combinatorial biosyntheses of compounds", classified in many different classes and subclasses upon election of the particulars of the method (e...g final product, reagents and types of modification) including class 435, subclass 4+.
- 2. The inventions are distinct, each from the other because of the following reasons:
- 3. The methods of Group I and II are independent and/or patentably distinct since they have different method steps (e.g. enzymatic modification in liquid phase vs. in solid phase) which require different reagents and means of separation and purification and which would result in different final products. Additionally, due to these difference the search required for group I would be different and separately burdensome due to different manual and/or computer bibliographic and/or structure searches.

Page 3

Application/Control Number: 09/478,263

Art Unit: 1627

4. Because these inventions are distinct for the reasons given above and

a. have acquired a separate status in the art as shown by their different classification;

b. require different and separately burdensome manual and computer bibliographic, structure and

classification searches. search required for Group is not required for Group; and

c. because of their recognized divergent subject matter, restriction for examination purposes as

indicated is proper.

UPON THE ELECTION of the following groups, election of species is hereby required:

ELECTION OF SPECIES (GROUP I OR II)

5. Claims 1 (GROUP I) and 4 (GROUP II) are generic to a plurality of disclosed patentably distinct species comprising:

a. "COMPOUNDS" (final product);

b. "STARTER UNIT"

c. "FUNCTIONAL HANDLE"

d. "TEMPLATE STRUCTURES"

e. "BIOSYNTHETIC ENZYMATIC MACHINERY SYSTEMS"

f. "FUNCTIONALIZING"

The presently claimed invention (e.g. both Groups I and II) are drawn to methods which lack any recitation of compound structure regarding the starting product, the linker, the enzyme system of the type of derivation (e.g. functionalizing) as to permit a meaningful search of the presently claimed methods.

Page 4

Application/Control Number: 09/478,263

Art Unit: 1627

Additionally, the recitation of "functional language" with regard to the items a, b, c, d with a total lack of any core structure whatsoever which would elicit a common activity (e.g improper markush) would necessarily lead to the inclusion of compound of such diverse structure, function which would render search thereof overly burdensome.

Further, there is no limit as to enzyme structure and/or function and the "functionalizing" step would further encompass any modification.

Accordingly, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, e.g. a specific compound corresponding to items a.-d. Above, a single enzyme species corresponding to e. above and a single type of functionalization corresponding to f. above even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Application/Control Number: 09/478,263

Art Unit: 1627

General information regarding further correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Celsa whose telephone number is (703) 305-7556.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jyothsna Venkat (art unit 1627), can be reached at (703)308-0570.

Any inquiry of a general nature, or relating to the status of this application, should be directed to the Group receptionist whose telephone number is (703) 308-0196.
